

Amendments to the Claims:

1. (Original) A plant cell of a *Brassica napus* plant having an "R" rating for blackleg and resistance to at least one AHAS-inhibitor herbicide, wherein said plant is designated variety NS3213, representative seed of said variety having been deposited under ATCC Accession No. PTA-2471.
2. (Original) A tissue culture of regenerable cells of a *Brassica* plant having an "R" rating for blackleg and resistance to at least one AHAS-inhibitor herbicide, wherein said plant is designated variety NS3213, representative seed of said variety having been deposited under ATCC Accession No. PTA-2471.
3. (Currently Amended) A ~~method of regenerating a~~ *Brassica* plant having an "R" rating for blackleg and resistance to at least one AHAS-inhibitor herbicide ~~comprising growing produced from the tissue culture of claim 2 under conditions sufficient for regenerating the Brassica plant having an "R" rating for blackleg and resistance to at least one AHAS inhibitor herbicide.~~
4. (Currently Amended) A ~~part of a~~ *Brassica* plant or plant part having an "R" rating for blackleg and resistance to at least one AHAS-inhibitor herbicide, wherein said plant is designated variety NS3213, representative seed of said variety having been deposited under ATCC Accession No. PTA-2471.
5. (Previously Presented) A plant part in accordance with claim 4, wherein said plant part is selected from the group consisting of tissue, pollen, ovules, roots, leaves, cotyledons, hypocotyls, embryos, pods, flowers, shoots, stalks, seeds, and microspores.

6. (Previously Presented) A method for regenerating a *Brassica* plant having an "R" rating for blackleg and resistance to at least one AHAS-inhibitor herbicide, the method comprising growing the plant part of claim 4 under conditions sufficient to regenerate a *Brassica* plant.
7. (Currently Amended) A method of breeding a *Brassica* line comprising crossing a first *Brassica* plant having an "R" rating for blackleg and resistance to at least one AHAS-inhibitor herbicide with a second *Brassica* plant, wherein said first *Brassica* plant is designated variety NS3213, representative seed of said variety having been deposited under ATCC Accession No. PTA-2471, ~~and wherein the progeny of said *Brassica* line have at least partial tolerance to at least one AHAS inhibitor herbicide and wherein at least the AHAS mutation is inherited from said first *Brassica* plant.~~
8. (Currently Amended) The method according to claim 7, further comprising a wherein the breeding program is selected from the group consisting of pedigree breeding, crossing, self-pollination, haploidy, single seed descent, modified single seed descent and backcrossing followed by selecting for a *Brassica* line that has an "R" rating for blackleg and resistance to at least one AHAS-inhibitor herbicide.
9. (Original) The method according to claim 7, wherein said second plant is *Brassica napus*.
10. (Original) The method according to claim 7, wherein said second plant is *Brassica juncea*.

11. (Original) The method according to claim 7, wherein said second plant is *Brassica rapa*.
12. (Currently Amended) A method for producing a first generation (F1) hybrid *Brassica* seed comprising crossing a first *Brassica* plant having resistance to at least one AHAS-inhibitor herbicide and an "R" rating for blackleg with a second ~~inbred~~ *Brassica* plant of a different variety than said first *Brassica* plant and harvesting the resultant first generation (F1) hybrid *Brassica* seed, wherein said first *Brassica* plant is designated variety NS3213, representative seed of said variety having been deposited under ATCC Accession No. PTA-2471.
13. (Original) The method in accordance with claim 12, wherein said second *Brassica* plant is *Brassica napus*.
14. (Original) The method in accordance with claim 12, wherein said second *Brassica* plant is *Brassica juncea*.
15. (Original) The method in accordance with claim 12, wherein said second *Brassica* plant is *Brassica rapa*.
- 16-34. (Canceled)
35. (New) A *Brassica* progeny plant or plant part of variety NS3213, wherein said progeny plant or plant part has an "R" rating for blackleg and resistance to at least one AHAS-inhibitor herbicide, representative seed of said variety having been deposited under ATCC Accession No. PTA-2471.

36. (New) A *Brassica* progeny plant or plant part of claim 35, wherein said progeny plant or plant part is an F1 hybrid plant or plant part.
37. (New) A *Brassica* progeny plant seed of variety NS3213, wherein said progeny plant seed has an "R" rating for blackleg and resistance to at least one AHAS-inhibitor herbicide, representative seed of said variety having been deposited under ATCC Accession No. PTA-2471.
38. (New) A *Brassica* progeny plant seed of claim 37, wherein said progeny plant seed is an F1 hybrid seed.
39. (New) A *Brassica* progeny plant cell of variety NS3213, wherein said progeny plant cell has an "R" rating for blackleg and resistance to at least one AHAS-inhibitor herbicide, representative seed of said variety having been deposited under ATCC Accession No. PTA-2471.
40. (New) A *Brassica* progeny plant cell of claim 39, wherein said progeny plant cell is an F1 hybrid cell.
